

GF-2G-LGX02-GXO-1

1 x 3CH CEx WDM

1. Product overview

1 x 3CH CEx WDM for coexistence of GPON / XGS-PON / OTDR over shared optical fiber. Wavelength-selective optical paths combine or separate the supported services, allowing access-network upgrades using existing fiber infrastructure.

6. Optical characteristics

Values below are from the linked original PDF / identified family PDF. Bandpass and insertion loss apply to the corresponding COM-service path.

Service / path	Bandpass (nm)	Insertion loss (dB)	Isolation (dB)
GPON	1290-1330 / 1480-1550	<0.9	>30
XGS-PON	1260-1280 / 1575-1580	<1.1	>30
OTDR	1600-1675	<1.3	>30

Parameter	Specification
Uniformity	<0.8 dB
Return loss	>55 dB
Directivity	>55 dB
Polarization dependent loss (PDL)	<0.3 dB
Polarization mode dispersion (PMD)	<0.2 ps
Optical power handling	<300 mW

Insertion loss includes WDL, TDL and PDL, with two sets of mated connectors at both ends, as stated in the source PDF.

7. Digital diagnostics and management

No digital management or diagnostics interface is specified. OTDR optical access supports testing by an external instrument; the CEx module itself does not perform the measurement.

8. Safety and regulatory

No product-specific safety classification, regulatory certification or compliance test is stated in the reviewed sources.
